

Kids Crafts Instructions

Day 1: Stuck On You

Supply Check

- 2 – extra large glass gems
- 2 – stamp pads
- 2 – white cardstock squares
- 2 – magnets
- 1 – paintbrush
- 1 – cup of clear glue

*You will also need a pencil and scissors. These were not included in your daily craft bag

Instructions

1. Wash your hands! You will be fingerprinting during this craft and you don't want parts of your breakfast or snack in there...do ya?!
2. Set up your workspace. Take all of your materials out of the bag and place them on your table.
3. Grab the cardstock (thick paper) and place it in front of you.
4. Find the stamp pad and gently but firmly stamp your finger. Before stamping your fingerprint on the paper, be sure that most of your finger has ink on it.
5. Firmly place your inky finger on the cardstock. Press and hold for at least 3 seconds. When you lift, be sure to lift straight up. If you drag your finger, it will ruin your fingerprint.
6. As you can see from the example, we are making heart shapes with our fingers. You will repeat steps 4 and 5 but move slightly to the left or right, to create the heart shape.
7. Use both pieces of cardstock to make 2 fingerprint hearts.
8. Wait a few minutes and double check to see if your fingerprints have dried. Do not start the next step until they are dry.
9. While you wait for it to dry, you can go wash your finger.
10. Next, grab one of the glass gems. Center the heart in the middle of the gemstone. Trace around the edge of the stone with your pencil.
11. Now write across the center, "God loves you!"
12. Carefully cut the line that you traced around your fingerprints. Do this for both hearts.
13. Grab your paintbrush and cup of glue.
14. Make sure that the flat side of your gemstones are facing up towards the ceiling. In the next step, you will be gluing the heart side of your fingerprints to the flat side of the gemstone.
15. **Lightly** dab your brush into the glue. You do not need to use a lot. If you use too much glue, it will smear your fingerprints, so be careful! Lightly coat your cut out fingerprint (the side that has the heart) with glue. Attach it to the flat side of the gemstone and leave it facing up towards the ceiling to dry. Repeat this process with the other gemstone and heart fingerprint.
16. Now, grab your magnet. Brush one side of the magnet with glue. Place the magnet in the center of your gemstone and press firmly for 10 seconds (Count 10 Mississippi's). Leave it facing up to dry. Repeat this process with the other gemstone and heart fingerprint.
